

JPC

JESUS PENA CORDOVA

AI TRAINER | LLM EVALUATOR | PROMPT ENGINEER

Analytical • Detail-Oriented • Bilingual • Results-Driven

PROFESSIONAL SUMMARY

Bilingual AI and technology professional with technical studies in Information Technology and hands-on experience building AI-powered web applications, bots, automation workflows, trading research tools, dashboards, and software prototypes. Skilled in evaluating LLM outputs for factual accuracy, reasoning quality, relevance, instruction following, safety, and clarity; ranking responses; detecting hallucinations; verifying facts; refining prompts; and producing structured feedback in English and Spanish.

PROFESSIONAL EXPERIENCE

Independent AI Applications Developer & LLM Evaluator

Self-Employed | U.S.

- Built AI-powered web applications, bots, dashboards, and workflow automations for business and analytical use cases.
- Evaluated model outputs for accuracy, relevance, reasoning, completeness, safety, and instruction compliance.
- Compared and ranked competing responses using defined quality criteria and concise written justification.
- Identified hallucinations, unsupported claims, coding errors, and logical gaps; improved outputs through prompt refinement.
- Developed AI-assisted High-Frequency Trading Research tools for market analysis, pattern recognition, and strategy testing.
- Created AI visual assets and improved digital products through UI/UX, SEO, and structured technical problem solving.

SELECTED PROJECTS

AI Trading Research Platform

AI-assisted market analysis, indicator evaluation, pattern recognition, and strategy experimentation.

LLM Evaluation & Prompt Optimization

Response ranking, hallucination detection, reasoning review, fact verification, and prompt improvement.

AI Web Applications & Automation

Bots, dashboards, APIs, intelligent workflows, and software prototypes for practical business tasks.

KEY QUALIFICATIONS

- Evaluate LLM responses for factual accuracy, reasoning, relevance, clarity, safety, and instruction following.
- Write precise feedback, rank outputs consistently, and work independently under detailed quality guidelines.
- Apply bilingual English-Spanish evaluation across technical, business, coding, and research-oriented tasks.

CORE SKILLS

- LLM Evaluation & Response Ranking
- Prompt Engineering
- RLHF & Human Feedback Concepts
- Reasoning Quality Evaluation
- Hallucination Detection
- Fact Verification
- Safety & Policy Evaluation
- Python, JavaScript, HTML/CSS
- REST APIs, OpenAI APIs, SQL
- Technical Writing & QA

LANGUAGES

Spanish - Native

English - Professional working

EDUCATION

Technical Studies in
Information Technology
Computer Systems Technician
